Cookie Policy

Last updated: October 28, 2026

Introduction

Our platform, including **offhrs.app** and **partners.offhrs.app** (collectively, the “Site”), uses cookies, device identifiers, and local web storage to distinguish you from other users. This allows us to keep you signed in, run secure payments, and (only if you accept) measure our Meta advertising with the browser Meta Pixel.

We do **not** use Google Analytics, Google Ads tags, or Meta’s server-side Conversions API on the Site. Advertising measurement is limited to the Meta Pixel for Facebook and Instagram campaigns managed in Meta Ads Manager.

1. Strictly necessary cookies

These tokens are vital to the platform’s core infrastructure. Disabling them will cause authentication timeouts, cart dropouts, and dashboard connection failures.

Cookie name	Provider	Set on	Why we use it	Duration
sb-access-token	Supabase	*.offhrs.app	Stores the JWT used to maintain authenticated vendor and consumer sessions.	Session
sb-refresh-token	Supabase	*.offhrs.app	Used to safely reissue short-lived access tokens so you do not have to log in repeatedly.	1 year
__stripe_mid	Stripe	*.offhrs.app	Machine identifier used by Stripe to run background risk analysis and detect card fraud.	1 year
__stripe_sid	Stripe	*.offhrs.app	Session token used by Stripe to preserve payment state across checkout redirects.	30 minutes

Cookie name	Provider	Set on	Why we use it	Du Partners
offhrs_channel_shop	offhrs	offhrs.app	Signed, HttpOnly cookie that keeps a Shopify merchant connected to their offhrs Sync app session inside the Shopify admin. Set only for merchants who open the offhrs Sync app.	7 days

2. Functionality cookies

These allow our views to remember local layout options, scheduling preferences, and your ad-cookie choice.

Cookie name	Provider	Set on	Why we use it	Duration
offhrs_tz	offhrs	*.offhrs.app	Stores the local timezone so booking dates render correctly against UTC server records.	1 year
offhrs_theme	offhrs	*.offhrs.app	Caches user theme preferences (light / dark mode).	Persisted
offhrs_ad_consent	offhrs	offhrs.app (localStorage)	Remembers whether you accepted or declined advertising cookies (Meta Pixel) so we do not ask on every visit.	Persisted

3. Targeting & advertising cookies (Meta)

If you choose **Accept** on our cookie banner, we load the Meta Pixel. Meta may then set the cookies below to measure whether someone who saw or clicked a Facebook or Instagram ad visited our Site (for example, a vendor completing trial signup). We do not load Google advertising or analytics tags.

Cookie name	Provider	Set on	Why we use it	Duration
_fbp	Meta	offhrs.app	Set by the Meta Pixel when you accept advertising cookies. Helps Meta measure and optimize our Facebook and Instagram ads (via Meta Ads Manager) and may support retargeting.	3 months

Cookie name	Provider	Set on	Why we use it	Duration
_fbc	Meta	offhrs.app	May be set when you arrive from a Facebook or Instagram ad click, so Meta can attribute that visit to a campaign.	3 months

Partners

If you choose **Decline**, we do not initialize the Meta Pixel and these advertising cookies are not set by us for that purpose. You can change your mind later by clearing site data for offhrs.app (which clears `offhrs_ad_consent`) and revisiting the Site.

4. Disabling and managing cookies

Use the on-site banner to accept or decline advertising cookies. You can also alter cookie visibility or wipe historical tracking in your browser:

- **Google Chrome:** Settings › Privacy and security › Third-party cookies
- **Apple Safari:** Settings › Safari › Advanced › Cookies and Website Data
- **Mozilla Firefox:** Settings › Privacy & Security › Cookies and Site Data

Note on platform interaction: if you configure your browser to drop or block all strictly necessary cookies, you will be unable to initialize vendor dashboards on partners.offhrs.app or securely register for workshops on offhrs.app. Declining advertising cookies alone does not block sign-in or checkout.
