Introduction

At offhrs ("we", "us", "our"), we are committed to protecting the privacy and security of our users. For the purposes of the **Personal Information Protection and Electronic Documents Act (PIPEDA)** and applicable Canadian privacy legislation, offhrs acts as the data custodian and controller for information collected through our ecosystem.

This Privacy Policy ("Notice") outlines how we collect, manage, use, and safeguard personal data across the website **offhrs.app**, the vendor portal **partners.offhrs.app**, and our official mobile applications on the Apple App Store and Google Play Store (collectively, the "Services").

If you have any questions or wish to exercise your data rights, contact us at hello@offhrs.app.

1. Scope of this notice

This Notice applies to the following individuals interacting with the Services:

- **Consumers (students/bookers and Marketplace buyers):** individuals who browse the app, create profiles, book creative workshops, and buy Marketplace goods.
- **Vendors (makers/studio owners):** solo entrepreneurs, instructors, or businesses who use our Partners tools (a workshop plan such as Lite or Pro, Shopify Sync, and/or the Artist Marketplace) to host classes, sell goods, and manage scheduling and orders.

2. Information we collect & how we use it

2.1 Technical and device infrastructure data

Whenever you interact with offhrs.app or partners.offhrs.app we automatically log network data to ensure application performance and prevent fraud:

- **What we collect:** IP addresses, device hardware signatures, operating-system versions, browser types, session interaction telemetry, and cookie tokens.
- **Approximate location.** If you choose to share it, we may store a Canadian postal code and/or coarse latitude/longitude derived from your device or from geocoding that postal

code, so we can show and sort workshops by distance. This is optional and is not sold to third parties. It is separate from Meta advertising cookies described below.

- **Lawful basis:** legitimate interests (platform stability, security, and performance).

2.2 Account and profile records

- **Consumers:** name, email, optional mobile number, postal code, and tokenized payment references (we never store full card numbers).
- **Vendors:** during signup on partners.offhrs.app, we collect business name, business email, contact details, address (including a Canadian ship-from or pickup address if you sell Marketplace goods), your GST/HST registration status, and the verification information Stripe Connect requires for payouts (tax ID, banking).
- **Lawful basis:** performance of a contract (to operate your account and fulfil a booking).

2.3 Booking and scheduling data

- **What we process:** workshop timestamps, capacity, slot availability, booking history, attendance, cancellations, and refund records.
- **Data flow:** we render open slots to consumers based on the Vendor's published schedule and the active bookings in the system. Slot counts are reconciled automatically when bookings, refunds, or account deletions occur.
- **Lawful basis:** performance of a contract & legitimate interests (preventing scheduling conflicts).

2.4 Marketplace order data

- **What we process:** when you buy Marketplace goods, your name, email, optional phone, shipping address (or pickup details), order contents and amounts, tax calculated on the order, payment references from Stripe, shipping labels and tracking, and any damaged / not-as-described claim you submit (including descriptions and photo links).
- **Why:** to process payment and tax, enable the Vendor to fulfill the order, ship and track it, handle refunds, claims, and chargebacks, prevent fraud, and meet legal and tax record-keeping duties.

2.5 Shopify Sync data (Vendors)

- **What we process:** if you install the offhrs Sync app from Shopify, we process your shop domain, your product, inventory, and product-listing information (such as titles, descriptions, images, prices, and availability), and your Shopify billing status.
- **What we do not request:** access to your Shopify customer or order data. Shopify may send us data-request or deletion notices under its program requirements, and we handle them as

required.

- **Why:** to create and update your workshop listings on offhrs and to manage your Shopify Sync subscription. If you uninstall the app, we stop syncing and remove or archive the synced listings.

3. Data sharing and marketplace architecture

offhrs is a marketplace facilitator. To complete transactions, your data flows along specific paths:

- **Between consumer and vendor (workshops).** When a student purchases a workshop ticket, their name, contact number (if provided), and email are shared with the hosting Vendor so the studio can coordinate materials and communicate logistics.
- **Between consumer and vendor (Marketplace).** When you purchase Marketplace goods, your shipping name, address, phone (if provided), and email are shared with the Vendor solely to fulfill the order (print a shipping label or coordinate pickup) or respond to an order claim. Vendors must not use that data for off-platform marketing without your explicit opt-in.
- **Marketplace claims.** If you submit a damaged / not-as-described claim, we process your description and any photo links you provide so we and the Vendor can investigate. Claim records are retained with the order for support and compliance.
- **Sensitive data note.** If a Vendor requests health or accommodation information via their own intake forms (e.g. allergies in a cooking class), the Vendor is the sole data controller for that sensitive information. offhrs is not the controller for off-platform forms.
- **No selling of personal data.** offhrs does not sell, lease, or trade your phone number, email, or reviews to third-party data brokers or external marketing lists.

4. Service providers we use

We share data only as needed to run the Services:

- **Supabase** — authentication and database hosting.
- **Stripe, Stripe Connect Express & Stripe Tax** — processing payments for workshop tickets, Marketplace goods, and the monthly Vendor SaaS subscription, calculating tax on Marketplace orders (using the shipping or pickup address), and routing Vendor payouts. **We never store raw credit card numbers or CVV codes.** We retain only tokenized references provided by Stripe (card brand, last four digits, expiry).
- **Shippo** — when you buy Marketplace goods, we use Shippo to obtain Canada Post rates, purchase prepaid labels, and receive tracking updates. Address and parcel details are shared with Shippo and the carrier (Canada Post) as needed to generate labels and deliver the order.

- **Shopify** — if you are a Vendor who uses Shopify Sync, we receive Shopify Data from your store and Shopify bills the Shopify Sync subscription (see section 2.5).
- **Resend** — sending transactional emails (booking confirmations, order and shipping notices, refund and dispute notices, account alerts) and any marketing emails you have explicitly agreed to receive.
- **Vercel** — web hosting and edge delivery for offhrs.app and partners.offhrs.app.
- **Expo / Apple / Google** — mobile app distribution and over-the-air updates (Google here means the Play Store / Expo tooling, not Google Analytics).
- **Meta Platforms (Facebook / Instagram)** — if you accept advertising cookies on offhrs.app, we load the Meta Pixel so Meta can help us measure and optimize ads we run in Meta Ads Manager (including Instagram). Meta may receive browser identifiers and page-view or conversion events (for example, a Lead event when someone opens an external workshop booking link). We do not use Google Analytics, Google Ads tags, or Meta's server-side Conversions API. See our Cookie Policy for cookie names and how to decline.

5. Data retention

- **Active accounts.** Profile settings, calendar structures, and workshop history are retained for the lifecycle of your active registration.
- **Account deletion.** When you delete your account from the mobile Profile screen, we remove your profile, saves, and reviews from production databases. Active workshop bookings are refunded and those booking records are anonymized. Affected workshop slots are reconciled so partners see accurate availability.
- **Marketplace orders.** Unshipped Marketplace orders are refunded, then anonymized. Orders that are awaiting pickup, in transit, inside the 14-day delivery claim window, or under an open claim or payment dispute temporarily block account deletion until that order is finished (we show a clear message in the app). Finished, quiet orders are anonymized (name, email, and shipping address removed) while payment, tax, and order amounts are kept for up to **six (6) years** for tax, audit, and dispute purposes. Contact hello@offhrs.app if you need help completing deletion.
- **CRA retention.** Transaction logs, HST billing records, and Stripe settlement records are retained securely for up to **six (6) years** to satisfy Canada Revenue Agency audit requirements.
- **Anonymized telemetry.** Aggregated platform telemetry stripped of personally identifiable information may be retained indefinitely.

6. Your Canadian privacy rights

Under PIPEDA you have:

- **Right of access.** Request an export of your profile and booking history at hello@offhrs.app.
- **Right of rectification.** Correct inaccurate records or update tax/postal-code settings at any time in the app.
- **Right of erasure.** Request permanent deletion of your account. We purge personal information from production within 30 days, keeping only what is required for tax audit validation (see section 5).
- **Right to complain.** If you are not satisfied with our response, you may contact the Office of the Privacy Commissioner of Canada (OPC).

7. Security and international transfer

We use industry-standard measures to protect your data, including TLS encryption in transit and Row Level Security on the Supabase backend. Our providers may process data in the United States or other countries; we rely on appropriate safeguards (such as standard contractual clauses) where required.

8. Revisions to this notice

We may modify this Notice as our product evolves. Any changes will be posted on this page with an updated timestamp. For significant changes impacting user tracking or data flows, we will push an alert or a mandatory update confirmation inside our mobile applications.

9. Contact

For privacy requests or questions, email hello@offhrs.app.
