PDF generated from source for counsel review · 2026-11-01

1. Scope

This Addendum applies when you enable the Artist Marketplace on partners.offhrs.app (included with Pro, or via free Marketplace-only enrollment). It supplements the Terms of Use, Service Terms, Privacy Policy, Content Policy, and Data Protection Addendum. Capitalized terms have the meanings in those documents unless defined here. You accept this Addendum when you enable the Artist Marketplace, publish a Marketplace product, or confirm the shipping attestation in your dashboard.

You manage products, shipping settings, and orders under **Marketplace** in the Partners dashboard. Buyers shop in the offhrs mobile app (**Shop** tab) and view purchases under **Profile → Orders**.

Shopify Sync applies to workshop listings only. It does not list physical goods from your Shopify store on the Artist Marketplace.

2. Seller of record, fees, postage, and tax

- You are the seller of record for Marketplace goods. offhrs does not take title to inventory.
- Platform fee: **3%** of item subtotal (ex-tax), plus Stripe's standard card-processing fee (currently **2.9% + CA$0.30** per successful transaction for domestic cards, as published by Stripe; international cards and other methods may cost more), separate from workshop bookings (0% commission).
- Sales and shipping are **Canada only** (CAD). You must ship from a Canadian address.
- Buyer-paid shipping (Canada Post rate quote plus any handling fee you set) is collected at checkout and **held by offhrs** to purchase prepaid labels on offhrs' Shippo account. You print the label and drop the parcel at Canada Post. Postage and handling collected for shipping are **not** merchandise revenue and are **not** paid out as seller earnings.
- If you are registered for GST/HST, offhrs calculates and collects applicable GST/HST on Marketplace sales at checkout into your Stripe Connect account (same model as workshop tickets). That tax is paid out to you with the order and you remain responsible for remitting it to the CRA. If you are not registered, offhrs does not collect GST/HST on Marketplace checkout. You must keep your registration status and number accurate in dashboard tax settings (see the Terms of Use, Section 2).

- Your approximate Marketplace payout is the item subtotal minus the 3% platform fee and Stripe processing fees, subject to refunds, adjustments, and clawbacks described below.

3. Fulfillment, First Scan, insurance, and pickup

- For shipped orders, purchase a prepaid label from the Orders panel and obtain a drop-off receipt (or equivalent). Carrier acceptance / **First Scan** is the milestone after which lost-in-transit claim eligibility with Canada Post generally begins and buyer cancellation / platform refund of the order is blocked.
- **Lost in transit.** Claims are filed with Canada Post. Reimbursement to the buyer is limited to the carrier's insurance payout (including any extra insurance purchased at checkout). Any gap above that payout is your responsibility. offhrs does not operate a Platform Protection Guarantee.
- **Delivered.** After a Delivered scan, porch theft / post-delivery loss is the buyer's risk (subject to chargeback rules in the Terms of Use).
- Orders with an item subtotal of **$250 CAD or more** may automatically include signature confirmation and carrier insurance, with the extra cost passed to the buyer at checkout.
- If you offer local pickup, coordinate pickup as disclosed; mark the order picked up in the dashboard when the buyer collects the goods.

4. Ship-by SLA and cancellations

- Default: purchase label and drop off within **5 business days** of payment unless you set a longer made-to-order window disclosed at checkout. offhrs may send ship-by reminders.
- If an order is not labelled and shipped (or, for pickup, made available) within the ship-by window, offhrs may, but is not required to, cancel and refund the order before First Scan. Repeated missed ship-by windows may result in delisting of your products or suspension of Marketplace access.
- Cancel / refund **before** First Scan: the buyer may cancel from **Profile** → **Orders** for an automatic full refund; you may also refund from the Marketplace Orders panel; and offhrs may refund (for example, for a missed ship-by window). When a refund is issued, labels are voided when the carrier allows (Canada Post may impose a short non-void window after purchase), and the buyer receives the full amount paid. Stripe does not return its processing fee, and that fee remains your responsibility, the same as a refunded workshop booking. After First Scan: cancellation and platform refund of the paid order are blocked; quality issues follow Section 5.
- You warrant accurate weight and dimensions. Carrier postage adjustments (APV / underpaid postage) may be charged back to you via Stripe Connect debit, transfer reversal, or invoice.

5. Returns and SNAD / damaged claims

- You may select **no returns for buyer's remorse** if clearly disclosed before purchase.
- You **must** address goods that are damaged in transit or significantly not as described (**SNAD**) within **14 days** of delivery or pickup. Buyers may open a claim in the app (or via hello@offhrs.app). Photos of the packaging and item should be provided when relevant. You should respond promptly in the Orders panel; offhrs may resolve or reject claims in good faith.
- This is not a full returns portal. Refusing valid damaged/SNAD remedies may lead to chargebacks and Connect clawbacks under the Terms of Use.
- Where a refund or other remedy to the buyer arising from a claim is funded by offhrs or Stripe on your behalf, you authorize offhrs to recover it by the same means described in Section 6.

6. Chargebacks and clawbacks

Chargebacks on Marketplace orders are governed by the Terms of Use. You authorize Connect debit, transfer reversal, offset, or invoice for disputed amounts, Stripe dispute fees (currently about CAD $15 per dispute, subject to change), APV shortfalls, and related costs. You must provide evidence (labels, tracking, packing or pickup proof). Repeated clawback failures or abnormal dispute rates may result in suspension of Marketplace access.

7. Buyer personal information (PIPEDA)

Shipping name and address (and email/phone as needed) are shared only so you can fulfill the order (print a label or coordinate pickup) or respond to a claim. You must not add the buyer's email or address to your own marketing lists without explicit opt-in, and you must not use that data for any other purpose.

You are accountable under PIPEDA for the buyer information you receive. You must keep it secure, keep it only as long as needed to fulfill the order, handle any claim, and meet your legal record-keeping duties, then delete or de-identify it, and notify us promptly at hello@offhrs.app if you suspect unauthorized access to it.

8. Prohibited goods

You must follow the Content Policy. No weapons, controlled substances, hazardous materials, recalled goods, counterfeit goods, mass-produced or dropshipped goods misrepresented as handmade or locally made, or other unlawful items. Disclose whether art is an original or a

reproduction/print. First Marketplace-only sellers may be subject to manual listing review before going live.

9. Product responsibility and indemnity

You are solely responsible for your products, including their safety, labelling, legality, and any recall, and for packaging them properly for shipment. You must consider carrying product liability insurance appropriate to what you sell. The Vendor indemnity in Section 7 of the Terms of Use applies to Marketplace goods and orders.
